

I am a professional truck driver and would be lost without xm radio, times in the desert when no radio is available makes my job easier, seems as though when something good comes along that benefits evryone, greed and jeralousy set in the way by corporate America. Kind of nice not to have things forced down your throat, by commercials and talk talk talk!! xm is truly America and all it stands for, freedom of choice, xm saves lives.....trust me I know what I am talking about...what a great thing for the backbone od America,,,those whom put everything you have from you back to what you out in your mouth...America moves by truck....get it Washington??? You are messing with the hands that take care of your families.....how long do you think we will continue to feel the Governments foot in our fannies....this is America....freedom rings remember??? XM must stay!!!
